(B)—SUBJECT INDEX.

In this section of the Index an attempt is made to enter the notices in such a way as to enable all references in the "Journal" to similar goods and similar matters to be readily found. For this purpose most of the notices are grouped under comprehensive headings, and are not entered separately under the heading of the particular article, &c. In some of the more important cases, however, a cross-reference will be found there. The following is a list of some of the sections used, with a rough analysis of their contents:—

	See Heading.

Openings for accessories for tramway construction, tramway material and rolling stock	Tramway material.

In the Subject Index, tender notices and commercial enquiries for agencies and agents, &c. (which are of purely passing interest and usually out of date by the time of the publication of the Index) are not entered at all; they may be found under the various countries in the Geographical Index.

Notices of tariff changes and customs regulations are not indexed according to subject, except in the more important cases, owing to the impracticability of giving a list in any way complete of references to each article.
